# Chemical peelings

## Last generation chemical peelings

Composition: lactic, mandelic, pyruvic and glyco-ferulic acid.  
Chemical peelings that will cover all esthetics needs like wrinkles, stains, marks, sagging, etc. It brings the skin PH from 2.8 to 3. Peelings will come with pre peel to disinfect skin and post peel to neutralize the chemical peeling effects.  
+18, all skin types

### Lactic acid

Chemical peeling

pH: 2,8 - 3,0

It is an organic Alpha hydroxide acid (AHA) that breaks the adhesion between the epidermis cells stimulating desquamation and exfoliation and giving a flash effect. Use it on fine lines, expression lines, sensitive skin and flash effect.

Do not use it on those who are allergic to milk, dermatitis and couperosis.

60ml CODE pm1

150ml pre peel and post peel included

### Mandelic Acid

Chemical peeling

It belongs to the Alphahydroxy Acids group (AHAS), it has a medium molecular weight, which allows the penetration into the epidermis to be much slower than other acids. It is obtained from the bitter almond and it is used on tissues renewal treatments.

Use it on oily skin, enlarged pores, sunspots, scaling of the skin, acne and scars. Do not use it on those who are allergic to almonds, dermatitis and couperosis.

60ml CODE pm2

150ml pre peel and post peel included

### Pyruvic acid

Chemical peeling

It is an Alpha-Keto Acid. It is characterized by the high lyophilized effect, which makes it capable to penetrate deeply and quickly. It has a low molecular weight so it penetrates to the deeper layers of the skin.

Use it on sagging skin, facial rejuvenation, antiwrinkle treatments, atonic skin.

Do not use it on sensitive skin, couperosis and dermatitis.

60ml CODE pm3

150ml pre peel and post peel included

### Glyco-Ferulic Acid

Chemical Peeling

2% Glycolic acid: It provides the skin with everything necessary to block the degeneration of the skin and maintain the proteins and essential molecules for longer, without degrading.

5% Glicolic acid: They have an exfoliating activity at the facial level eliminating seborrheic excesses and other substances that are harmful to the good condition of the skin.

60ml CODE pm5

150ml pre peel and post peel included

# Plasma Skin

## Epidermal Growth Factors

Composition: multieffect 3R, TGF Beta2, Epitevise, Synake, chia oil, niacinamide, soft focus agent, collagen and dermasooth.

Growth factors are proteins that works naturally as communication elements (signals) between skin cells. EGF achieve cell activation promoting cell regeneration and rejuvenation. Vegetal cells are converted into biofactories that produce human growth factors with identical regenerative characteristics that those produced by the skin naturally.

Through an efficient purification process, the growth factors of excellent quality are extracted with a high degree of purity, higher than 95%.

+35, all skin types
